

## Sports Medicine Information Line

When you're injured playing sports or recreational activities, timing is crucial. That is why easy access to information and professionals is critical. The Fort HealthCare Therapy and Sports Center has gone to great lengths to assure a timely and thorough plan of care for your injury. That is why we offer the Sports Medicine information line.

With just a phone call you can:

- Discuss your situation with a Licensed Athletic Trainer
- Schedule a time for a low cost consult – usually within 48 hours
- Get advice on what to do in the meantime
- Receive a physician referral – and advice on what type of doctor to see
- Get help with insurance or authorization questions
- Help ease the anxiety and confusion of what to do next
- Get advice on return to play or activity modifications

The Athletic Trainers answering your call are the same professionals that you see on the sidelines of athletic contests at the high school, college and professional level. They are often the first one to evaluate even the most traumatic injuries. Managing injury situations like these assures you will get qualified advice based on experience and a sincere interest in your problem.

To speak with one of our Licensed Athletic Trainers, call the Sports Medicine Information line at **920-568-6560**.

For more information on the qualifications and expertise of Fort HealthCare's Athletic Trainers, go to [www.forthhealthcare.com/athletic\\_trainers](http://www.forthhealthcare.com/athletic_trainers) or the National Athletic Trainers Association at [www.nata.org](http://www.nata.org).
