A Message from Mike

What does a healthy community look like?

This is a question that we ask ourselves and our health and wellness partners on a regular basis. We ask it because a healthy community and what that means to everyone that lives and works and plays in our neighborhoods is very important to us. We centered our Mission and Vision around this goal of creating the healthiest community in Wisconsin because we believe doing so will provide the best outcomes in life for everyone in this - and future - generations.

For over 75 years, this organization and the people in it have worked very hard to provide exceptional healthcare to the people of Jefferson County and the surrounding communities. And we recognize that the future of healthcare is changing. Good health is all about prevention. As Jefferson County’s premier provider of health services, we feel we are best able to positively impact the health of area residents, and we take that role very seriously.

How do we accomplish this? By demonstrating our commitment to you on a daily basis, and by working with our community and health and wellness partners, supporting our schools and local farmers, being involved with healthy events and activities, and encouraging everyone to have a primary care provider to help them manage their journey to better health.

One of the ways we measure this level of success is through the County Health Rankings, which help counties recognize what influences the health of residents and how long they will live. We’ve been able to maintain very good standing with the Rankings for Wisconsin, landing as the ninth healthiest county out of all 72 in the state. This is impactful, because just five years ago, we were in the low 30’s for County Health Rankings, and we’ve been in the top 10 now for the last three years. Our teams all have the end game in mind of improving that standing and we know we can only do so through partnerships with our community members.

Ties to our community partners have grown stronger over the years in many ways. One way we’re increasing the presence of positive influence we have within area schools is through our 20-year-plus
strong School Nurse Program, which has grown to serve over 12,000 children in nine school districts today. And recently, with the support of the Fort Memorial Hospital Foundation, the advocacy group Women Who CARE, and others, an additional commitment has been made with implementing a new School-Based Mental Health counseling service in Whitewater, Fort Atkinson, and Jefferson schools.

Our public intervention has also expanded to include participation in initiatives to reduce the underage alcohol use among our area’s youth, and ways to address the heroin overuse and opioid epidemic. We are working to fulfill our role in those big initiatives through changes in our daily operations and policies, and in activating change with our community partners.

We continue to support the employers of our communities through special programs and services. Helping our local employers have healthy employees helps them be productive and successful, which positively impacts our community and its economic standing. We apply many of the same programs and improvements to our own business as well.

As we celebrate all of our accomplishments and reflect upon the joys of serving the community for the past 75 years, we remain committed to accomplishing our goals in hopes of reflecting positively again in our even healthier future.

Together we can become the healthiest community in Wisconsin!

We are currently the healthiest county!

An improved County Health Ranking DECREASES the COST of everyone’s healthcare over time.

CountyHealthRankings.org
In December of 1941, the people of Jefferson County were faced with the news of the bombing of Pearl Harbor. They were also faced with the announcement that the physician-owned hospital on Madison Avenue in Fort Atkinson was scheduled to close.

However, there was an increased demand for medical care in the community. Plus a concern about how it would meet the needs of returning World War II veterans.

It was early in the year 1942 when a group of local citizens formed the Fort Atkinson Memorial Hospital Association to address these concerns. Soon after, they made a decision to lease and eventually purchase the Madison Avenue hospital until they could build a new one on Sherman Avenue. Although building material shortages caused by the war put their plans on hold, they had the foresight and courage to formulate their plans and secure sufficient land for future needs.

Eventually, their planning came to life with the construction of a brand new hospital structure. And in September 1950, the first patients were treated at the new hospital at the current location we recognize today. The Fort Atkinson Memorial Hospital Dedication Ceremony was held on August 27, 1950.

The program for the event stated that the hospital was “Dedicated to the memory of those men and women

Meeting the community’s healthcare needs is the reason we came to be and continue to serve.

In December of 1941, the people of Jefferson County were faced with the news of the bombing of Pearl Harbor. They were also faced with the announcement that the physician-owned hospital on Madison Avenue in Fort Atkinson was scheduled to close.

However, there was an increased demand for medical care in the community. Plus a concern about how it would meet the needs of returning World War II veterans.

It was early in the year 1942 when a group of local citizens formed the Fort Atkinson Memorial Hospital Association to address these concerns. Soon after, they made a decision to lease and eventually purchase the Madison Avenue hospital until they could build a new one on Sherman Avenue. Although building material shortages caused by the war put their plans on hold, they had the foresight and courage to formulate their plans and secure sufficient land for future needs.

Eventually, their planning came to life with the construction of a brand new hospital structure. And in September 1950, the first patients were treated at the new hospital at the current location we recognize today. The Fort Atkinson Memorial Hospital Dedication Ceremony was held on August 27, 1950.

The program for the event stated that the hospital was “Dedicated to the memory of those men and women

Taking a look back...
of this vicinity who served with the armed forces of the United States of America in the World Wars of 1914-1918 and 1939-1945, by the citizens and friends of Fort Atkinson, Wisconsin, and by the citizens of neighboring communities.”

Fort Atkinson Memorial Hospital was now a fully operational, non-stock, non-profit corporation organized under the name of Fort Atkinson Memorial Hospital Association, and belonged to the residents of the communities it served and governed by a Board of Trustees. This new hospital provided 62 beds for surgical patients and a nursery accommodating 16 babies. Modern equipment and advanced care for the time was provided.

The hospital received its first accreditation in 1952 from the Joint Commission on Accreditation of Hospitals (now the Joint Commission on Accreditation of Healthcare Organizations).

Over the decades, local demand for outpatient and other hospital services grew exponentially. To respond to the changing needs of the community, the hospital underwent expansion and renovation projects, adding operational and patient care areas and improvements in 1969, 1975, and 1986. By the late 1980s, Fort Atkinson Memorial Hospital was a 110-bed, state-of-the-art facility.

It was in 2003 when the organization added the name Fort HealthCare to its brand, to be representative of the full continuum of care provided through hospital and clinic services in the region. The evolution of healthcare has seen a shift from an emphasis on inpatient care to a balance between inpatient and outpatient services. Advances in technology and efforts to contain healthcare costs have brought about the need for outpatient services and shorter hospital stays.

And as is the case in more recent years, preventive medicine with an emphasis on primary care is deemed the best practice for positively influencing population health outcomes. As a result, our current Mission and Vision statements came to be.

Generations of families have grown and expanded since Fort Atkinson Memorial Hospital formed to serve its residents. To those who live and work in our communities, we continue to live our promise to help improve their health and well-being, with a Vision to become the healthiest community in Wisconsin.
Every minute of every day, someone enters a community hospital in need of assistance. Some are fortunate to have health insurance and find that most of the cost of care is covered. Others are not as fortunate and face both physical and financial hardship. Regardless of their personal or financial circumstances, we are here to help them.

Fear of a bill should never prevent a person from seeking care. Whether it is providing financial assistance to patients with limited resources through charity care programs, or improving access to essential and primary healthcare services by sponsoring free medical and dental clinics, hospitals provide a safety net of care in the community.

Without that care in place, state and local governments would have a much greater burden in trying to deliver these critical services to a vulnerable population. In addition, hospitals deliver millions of dollars of services aimed at improving the overall health of the community, partnering with public health departments and other local organizations to provide leadership, financial support and human resources in identifying and addressing community health priorities.

In all, Fort HealthCare provided more than $1.53 million in uncompensated charity care and $6.02 million in unreimbursed Medicaid in our last fiscal year, impacting multiple people in the communities we serve. We also understand that there are personal stories behind the statistics. We hope our commitment to getting people the care that they need demonstrates in a very real way our Mission to improve the health and well-being of our communities.

In addition to supporting community programs and charity care, we also contribute annually to several local schools, organizations, and health and wellness events.

Between October 1, 2016 and September 30, 2017, we donated $116,903 in sponsorships to over 75 local organizations.
Fort HealthCare and its Foundation, in partnership with the Fort Atkinson Community Foundation, Jefferson County Human Services, and Jefferson, Fort Atkinson, and Whitewater School Districts, recognized a need to collaborate and help the high school-aged youth in the community be able to receive behavioral health counseling services starting in the school setting.

The Fort HealthCare School-Based Behavioral Health Counseling program is designed to provide individual behavioral health counseling services to students that require it during the school day. The intention of the program is not to be a “quick fix” for issues, but to help students in need and establish a continuum of care for those who exhibit behavioral health needs beyond their graduation date. Families of students who are un- or under insured are not charged for this care.

The school-based treatment program helps students with issues such as depression, anxiety, mood management, self-regulation skills, alcohol and other drug use, coping with change such as divorce or death, managing stress or worry, developing healthy social skills, making positive decisions, and creating and maintaining healthy boundaries.

Each school’s Student Services Team identifies students who are struggling with issues that are impacting their success at school, and they intervene according to school policy. When it is determined that a student could use additional mental health support the team makes a referral to the School-Based Mental Health Counselor who is a Fort HealthCare Behavioral Health employee and a Licensed Professional Counselor/Substance Abuse Counselor.

Some of the programs and services we support regularly are:

- The Rock River Free Clinic
- The Community Dental Clinic
- Rainbow Hospice Care
- Tomorrow’s Hope
- Employer and Community Health Challenges
- Boys & Girls Club of Fort Atkinson
- Jefferson County Clean Sweep
- Area Farmers Markets
- Healthy Community Coalitions
- Sexual Assault Nurse Examiner (SANE) Program
- Camp 911 (health and safety information for kids)
- PEP Rally (pediatric wellness in schools)

School-Based Mental Health Counseling for Students

Fort HealthCare and its Foundation, in partnership with the Fort Atkinson Community Foundation, Jefferson County Human Services, and Jefferson, Fort Atkinson, and Whitewater School Districts, recognized a need to collaborate and help the high school-aged youth in the community be able to receive behavioral health counseling services starting in the school setting.

The Fort HealthCare School-Based Behavioral Health Counseling program is designed to provide individual behavioral health counseling services to students that require it during the school day. The intention of the program is not to be a “quick fix” for issues, but to help students in need and establish a continuum of care for those who exhibit behavioral health needs beyond their graduation date. Families of students who are un- or under insured are not charged for this care.

The school-based treatment program helps students with issues such as depression, anxiety, mood management, self-regulation skills, alcohol and other drug use, coping with change such as divorce or death, managing stress or worry, developing healthy social skills, making positive decisions, and creating and maintaining healthy boundaries.

Each school’s Student Services Team identifies students who are struggling with issues that are impacting their success at school, and they intervene according to school policy. When it is determined that a student could use additional mental health support the team makes a referral to the School-Based Mental Health Counselor who is a Fort HealthCare Behavioral Health employee and a Licensed Professional Counselor/Substance Abuse Counselor.
Fort HealthCare sponsors a full-time physician at the Rock River Free Clinic in Jefferson and provides free laboratory and radiology services to patients, which is valued over $157,264.

In addition to providing wellness care for the uninsured members of the community, an area of need was identified in addressing the prevalence of untreated behavioral health and substance abuse issues.

Since September 2016, the free clinic began universally screening every patient for depression, substance abuse and tobacco use. Using a lifestyle questionnaire designed by the University of Wisconsin – Whitewater, each patient responds to the written questions and if a certain score is attained, a further screening tool is utilized. The physician reviews the responses and is then able to question the patient in a more directed and intentional way. Based on screening results, more customized and often immediate care can be arranged through the clinic’s network and resources. The free clinic has been pleased to be able to assist those experiencing behavioral health issues.

Additionally, when the community came together to devise a way to manage the heroin crisis in the county, the medical director and Fort HealthCare primary care physician at the free clinic, Dr. David Rutledge, answered the call right away. He completed the necessary training to become a prescriber of Suboxone® which is used to treat adults who are dependent on or addicted to opioids (either prescription or illegal – such as heroin). With this training, he can provide the necessary medical component of the addiction recovery program for free clinic patients. At this time, the number of doctors in our area with a license to prescribe this medication is limited.

The free clinic observes that they would not be able to assist in this way if they did not receive support from Fort HealthCare, whose partnership began in 2012. The arrangement has been a very rich resource for those in the area without health insurance. Not only does this population now have access to healthcare, they are able to establish a relationship with a primary care physician who is knowledgeable about their health status and is able to partner with them to improve their overall health, which includes lifestyle choices.
Fort Memorial Hospital Foundation

The Fort Memorial Hospital Foundation is dedicated to raising new funds to support the strategic goals of Fort HealthCare. With the concept of Population Health as a guiding light, new opportunities for investment in the health of our community are emerging. The Foundation is prepared to be a source of funds to pilot or adopt services that help achieve improved health outcomes for our patients and community.

The following are examples of high impact services that are in place to assist people in the Fort HealthCare service area to improve their health and well-being. These grants are possible due to the generosity of individuals, businesses and organizations throughout the area we serve.

**Benevolent Care**

**Mammogram Vouchers** - Provide screening and diagnostic mammograms for people living in the Fort HealthCare service area who cannot afford them when prescribed or recommended by their physician. This program has helped improve early detection of breast cancer in our area.

**Indigent Discharge Prescription Program** - Provides medications for patients who cannot afford or access the prescriptions necessary to continue their healing after discharge from the hospital or emergency department at Fort HealthCare. This program has helped reduce hospital readmission rates for indigent patients.

**Living Healthier**

**Pediatric Wellness Program** - Fort HealthCare’s pediatric wellness programs include: PEP Rally, Diabetes Lunch N’ Learn, Movin’ & Losin’ for Families, Camp 911, and the Railyard Fitness Obstacle Course and mobile gym. These programs have helped equip students and their families to manage chronic disease, reduce childhood obesity and improve health awareness among school age children.

**Rock The Walk** - Community challenge that encourages, tracks and rewards increased exercise. Participation is extended to individuals, businesses and community groups as defined by the members of those groups. This program has become an annual event with growing participation throughout the service area.

*continued on next page*
Supporting Exceptional Care

**Healing Breast Care Center** - A multi-disciplinary program supporting breast cancer patients and survivors. The Center provides a wide range of services including pre- and post-operative care, Breast Patient Navigation, Lymphedema Precautions, scar care, exercise, massage, and a survivorship support system. This program serves people with breast cancer regardless of where they receive medical care.

**Sexual Assault Nurse Examiners** - A 24/7 on-call service to support victims of sexual and domestic abuse who seek treatment at the Fort HealthCare Emergency Department. This program is a starting point to help victims of abuse break the cycle of violence in their lives.

**Cardiopulmonary Rehabilitation** - Provide updates to the gym, audiovisual equipment, exercise equipment, patient monitors and educational opportunities for patients who are recovering from cardiac and pulmonary diseases. This program assists people to treat and recover from cardiopulmonary diseases and reduces readmission rates among affected patients.

**Pediatric Surgery Enhancement** - Updates to clinical spaces and educational materials to help pediatric patients prepare for surgery. This program has aided success and recovery from pediatric surgery due to lower stress and greater familiarity in uncommon surroundings.

**Obstetrics** - Support for a variety of services to help parents provide safe and healthy care for newborns. Specific programs include: Shaken Baby Education to prevent injury to infants; HALO® Sleep Sacks to provide safe sleeping for infants; Circle of Success care planning for expectant and post-partum mothers. This program has helped reduce incidence of preventable accidents and harm to infants.

**Simulation Laboratory** - The establishment a simulation laboratory utilizing hi-definition mannequins to update and maintain high quality clinical and patient care skills. Training is focused on annual competency measures, high risk low volume procedures, and assisting clinical teams to improve patient health outcomes through improved communication and efficiency. This program has skill levels and confidence among clinical teams.

Advancing Careers In Healthcare

**Scholarships** - In the past five years, scholarships in excess of $70,000 have been granted to employees and area residents pursuing degrees in the healthcare field. This program helps ensure that we continue to invest in a skilled and highly trained healthcare work force in our service area. [FortHealthCare.com/Foundation](http://FortHealthCare.com/Foundation)

A message from Dwight Heaney, Executive Director:

**Thank you!**

Your generosity to the Fort Memorial Hospital Foundation makes a difference in the health of our community. Your gifts touch the lives of family, friends, and neighbors with empathy, encouragement, and hope to live healthier lives.

Thank you to each and every person who supports the work of Fort HealthCare with your charitable contributions.

A local advocacy and networking group of women, in partnership with Fort HealthCare, that gathers to build relationships and learn about the health challenges in our area, seeking ways to help others live healthier lives. [FortHealthCare.com/WWC](http://FortHealthCare.com/WWC)
Our partnerships with Healthy Community Coalitions help us improve the nutrition, physical activity, and accessibility of health information and preventive healthcare screenings among individuals and families in our communities. We encourage you to become familiar with the coalition nearest you!

Watch a video on our website about the work our coalitions do!

FortHealthCare.com/Community-Coalitions

Partnerships are the foundation for community success. Our goal is to provide information, education, programs and tools that our communities can put in place to help individuals and families enjoy good health now and in the future. The Fort HealthCare Community Health & Wellness department works with the community coalitions to mobilize the assets of our partners in Jefferson County and the surrounding areas.
Technology is a strong component of a high-quality healthcare delivery system. When it comes to Magnetic Resonance Imaging (MRI), the ability for providers to see clearer pictures of scans and tests can mean everything in terms of getting treatment done early and accurately. An MRI is a scan that can produce detailed pictures of parts of the body, including the brain.

In late 2016, the Fort HealthCare Board of Directors and Mike Wallace, Fort HealthCare President & CEO, approved the purchase of a Signa™ Architect MRI machine from GE Healthcare.

The project included installing a larger machine (which is more comfortable for people with claustrophobia), and also a redesign of the MRI Suite itself. PDC Facilities out of Hartland and J.P. Cullen out of Janesville created a new atmosphere to enhance the patient experience.

The MRI technology is faster and delivers a higher image resolution. The MRI Suite includes adjustable ambient lighting that can change into different colors to give the room a spa-like feel. The suite also uses hi-definition screens to project relaxing images such as a coral reef, puzzles, animals, or outer space, just to name a few of the settings.

Music from Pandora is also available to listen to, designed to make your MRI experience much more relaxing and pleasant.
We once again received the distinction of Most Wired™ Hospital for 2017. This recognition is awarded by the national magazine Hospitals & Health Networks. Fort HealthCare is one of 16 hospitals in Wisconsin to receive this honor. To receive a Most Wired™ distinction, an organization must demonstrate advances in steps to implement robust clinical information systems aimed at improving patient care. This includes adopting technologies to improve patient documentation, advance clinical decision support and evidence-based protocols, reduce the likelihood of medication errors, and rapidly restore access to data in the case of a disaster or outage. One reason for Fort HealthCare’s excellence in information technology is its close alignment with Cerner Corporation, a leading health care informatics company.

As of January 2017, MyCompass users could begin using the OpenNotes™ feature of their patient portal, making it a place where those who are logged into their own electronic health record can review the visit notes their provider shared regarding their plan for care. This feature, along with the messaging capabilities in MyCompass, make communicating with your provider even easier than before.

The HealtheLife app gives you easy mobile access to your MyCompass patient portal. The online medical records content in the app is the same information that is available when you’re logged in online. The HealtheLife app is available for free from your app store for both the iPhone and Android systems.

We once again received the distinction of Most Wired™ Hospital for 2017. This recognition is awarded by the national magazine Hospitals & Health Networks. Fort HealthCare is one of 16 hospitals in Wisconsin to receive this honor. Center for JOINT REPLACEMENT

Experiencing joint pain?
If everyday activities such as walking, shopping, or housework are difficult or unbearable – and modifying your diet, exercising and taking medications no longer provide relief or alleviate your joint pain – it may be time to consider joint replacement surgery.

If you are experiencing any kind of joint pain, you should discuss it with your doctor or an orthopedic surgeon. Not all treatments wind up as a surgery. Your healthcare team can help to determine the course of treatment that’s right for you.

Our Comprehensive Approach
Here, we have a special program that brings a team of experienced and expert surgeons together with caring and specially-trained nurses, therapists and technicians. Our goal is to provide seamless, coordinated care to get you back to enjoying your favorite activities as soon as possible. Our staff has been hand-picked for their positive attitudes, motivational skills, and their passion for outstanding service. In addition, they have been specially trained to provide comprehensive clinical care for all people going through joint replacement surgery.

Patients have a dedicated joint care coordinator who is in touch with them throughout their entire experience, keeping them informed every step of the way. The entire joint replacement program is designed with you in mind - from pre-surgery education, to specialized care; through physical therapy and rehabilitation to complete recovery.

Within the hospital, we have created a special area just for the care of our joint replacement patients – an area welcoming of friends and family, and full of encouragement and positivity. And gone are the days of lengthy hospital stays - we’ll have you up and moving around and going home before you know it!

See what our patients have been saying about us! FortHealthCare.com/Joint

James Foskett, MD, Isidoro Zambrano, MD, and Paul Schuppnner, DO with Fort HealthCare Orthopaedic Associates.
In September, we celebrated our first anniversary of achieving our Baby Friendly™ accreditation. Fort Memorial Hospital and the Great Expectations Birthing Center is the 369th hospital in the United States to achieve this accreditation, and the 10th hospital in Wisconsin.

Being Baby Friendly™ means we adhere to the highest standards of excellence when it comes to delivering babies. Most importantly, it means our facility is a place where new mothers and their family experience a caring and encouraging environment where they and their new baby are the center of our care, and breastfeeding is encouraged to take place whenever and wherever necessary.

FortHealthCare.com/Baby
We understand the journey to lasting weight loss.

Whether you need a significant change in your life or are looking to drop 10 pounds, we encourage you to give our Weight Management Program a try. Our program has dedicated a special place on our website where we have put together a list of resources that we recommend and offer when it comes to health improvement and weight loss. These resources range from handouts and book recommendations, to exercise classes and programs that focus on nutrition or physical activity, to an even more dedicated Medically Supervised Weight Loss program.

Here, you will find a list of readily available resources about finding support for health and wellness. While we can’t do the work for you, we are happy to help guide you toward a program that you feel will benefit you. And the best part is you can tackle everything at your own pace. Whether you learn best with self-direction, technology, group settings, or prefer one-on-one attention, we have something for you. Our site even offers a Diet Readiness Questionnaire and a list of questions you can ask your primary care provider to help you get started.

Or, you could contact our Weight Management Specialist at 920-568-5489 for a free phone consultation to assist and guide you toward a program that will fit your needs. If you would like the Weight Management Specialist to call you instead, you can fill out the Weight Management Program Information Request form located on our website. Here’s to a healthier you!
Search by city, provider name, or specialty in our online Find A Doctor directory, or print a customized directory just for your needs. You can find this feature - as well as information and video profiles about our providers - on our website at: FortHealthCare.com/Directory.
